Project Spotlight

Axent is currently rolling out a variety of electronic price indicator boards with remote controlled price management systems across Melbourne.

Axent working with BP have a view to implement these systems throughout Australia over the next few years placing Axent at the fore-front of service station signage technology within Australia.

Product and Specification Sheet Number (Search via specification sheet # at axent.com.au)

Standard Pylon 300mm Digit & Truck Stop Pylon 600mm Digit

AX-PS300MTRX-G
AX-PS600MTRX-G

Our display consists of four digits – namely a leading ‘1’ followed by three digits capable of showing zero through to nine, together with a decimal point located on the lower edge between the last two digits (ie: 107.2).

The boards can be retrofitted into existing signs and are available in a range of colors including red, amber, white, green or blue. Character height can be customized to each client's requirements while communication with the sign can be Ethernet, data radio or GSM/GPRS.

- Automatically adjusts brightness in ambient light conditions
- Real time price indicator updates – pricing updates immediately when set
- High visibility in all weather conditions
- Australian designed and manufactured
- Complies with all Australian design standards
- Full tailored to each client's specifications and unique application requirements
- Wide angle viewing
- Many incorporated functions such as:
 - Self Diagnostics
 - Blanking the display
 - Interface with any controller
 - Flashing any or all of the display
 - Dynamically changing any or all of the display
 - Automatically dimming for varying light conditions and at night time

These price indicator segments have a total height of 300mm.

- Features as per Standard 300mm + Truck Stop Pylon
- Wide variety of LED colours available
- 600mm option available below

Price Indicator 7 Segment 600mm

AX-PS6007SEG-X

Axent's 7 Segment Price Indicator units can be sold as a separate unit or packaged into one of our standard 600mm pylons.

These price indicator segments have a total height of 600mm.

- Features as per Standard 300mm + Truck Stop Pylon
- Wide variety of LED colours available

Base Station

AX-302367

The Axent Base Station is housed securely in the main control counter where the service station attended is situated.

The Base Station controls the sign from a centralised unit via data radio or GSM/GPRS and sends up-dates to the selected pylon in real-time.

- Additional hand held remote control also available below

Remote Control - Hand Held

AX-302366

The Axent Remote Control a hand held device which can be used as an alternative communication device to up-date the sign. The remote control works by communicating to the base station which in turn sends an update to the sign.

It performs the same tasks and communicates to the base station and in turn the pylon in real-time via radio or GSM/GPRS.
