PRODUCT SPECIFICATION SHEET (AX-ARTYPC)

ARROW BOARD, TYPE C

Smart Controller

Product Key Features

- High efficient LED lamps
- Solar or mains panel
- Single or double sided
- Aluminium box
- Automatic dimming
- Controller
- AS/NZS 4192:1994

Smart Controller:

Mounted inside the cabin with LED display of the arrow and status information.

Simple Controller:

Mounted to the dash with buttons for each display function.

Product Ships with our Standard 12 Month Warranty

Overview

Axent Arrow Boards are highly visible, light weight, have low power consumption and are built tough to last in highly exposed outdoor conditions.

Axent arrow boards have been designed to meet the Australian/New Zealand arrow sign standard AS/NZS 4192:1994. Our Arrow Boards comprise of many light pixels which make up a left arrow, right arrow, double headed arrow or wig wags. The sign incorporates low voltage cut out as well as dimming and light measurements to enable the sign to compensate its intensity according to the ambient light conditions.

The Arrow boards can be controlled via one of two different controllers (the Smart Controller and the Simple Controller), the Smart Controller has an LED display of the arrow and status information whilst the Simple Controller is smaller so that it can easily fit into a car dash but has limited functionality compared to the Smart Controller.
