PRODUCT SPECIFICATION SHEET (AX-BSFIXFLL)

BOSCH FIXED FOCAL LENGTH LENSES

Product Key Features

- High quality optics
- DC-iris types (direct drive)
- Reliable, robust DC-iris mechanism
- 1/3-inch and 1/2-inch formats
- Standard CS-mounts
- Standard 4-pin miniature plug for simple connection

Overview

As CCTV cameras become more reliable and maintenance-free through the use of solid-state charge-coupled device (CCD) technology, the lenses also need to have the same high standards of quality and reliability. The range of Fixed Focal-length Lenses meets these tough requirements by providing long and reliable operation with no maintenance. Comprising DC-IRIS and video-iris types, the lens range from wide-angle to telephoto to cover virtually all applications in CCTV observation systems.

Axent can supply and install these products.
