- Reduces installation time to the absolute minimum
- Range of colour, monochrome and day/night units
- Choice of analog or network cameras
- Varifocal lenses for on-site adjustment of field-of-view
- Bilinx bi-directional communication

Overview

The LTC Series Indoor Camera kits provide the most economical package available for indoor applications. These units reduce the required installation time to the absolute minimum. Only the power supply and video cables need to be connected to obtain superior picture performance in virtually all indoor applications. A wall bracket is also included in the package. The Indoor Camera kits are based on the Dinion Series of analog IP cameras. The Dinion camera range covers standard and high resolution as well as monochrome and colour versions. In addition, these camera kits include a pre-assembled varifocal lens which allows the field-of-view to be adjusted on site, allowing optimum area coverage.

The camera kit can be used in a large variety of places such as retail stores, health care facilities, financial institutions, educational environments and industrial areas, in fact any general indoor use.

Axent can supply and install these products.
