## PRODUCT SPECIFICATION SHEET (AX-VLHL)

# GENERIC HEARING LOOP INSTALL

### Product Key Features

- Relay audio to hearing aids

## Overview

Axent manufactures hearing loops, which are used to relay audio on the same frequency as hearing aids so the hearing impaired do not miss out on important information.

Axent has a lot of experience in this area and has the capability of developing systems for many different environments and applications. For further information on our range of hearing loops please contact Axent.
