PRODUCT SPECIFICATION SHEET (AX-SAC01-540)

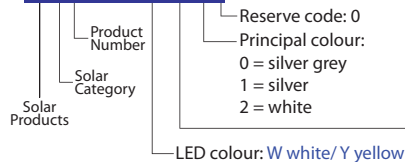

LED SOLAR 540 STREET LIGHT

Product Key Features

- Solar powered (130W, 17.4V)
- White/Yellow LED's (540pcs)
- Only 77.7kg total weight
- Suggested install height is around 6.5m
- Optimal design for solar powered input and LED illuminating output
- Compact all in one DIY design easy to install
- Maximize solar power efficiency
- Wireless low cost low electricity loss
- Green energy concept design
- Super bright LED homogenous lighting distribution
- Long life duration maintenance free
- Strong housing weather proof design

SAC01-88XXXXX

Number of light/watt:
 9A = 9L175W
 9B = 9L130W

Overview

Axent's range of Solar 540 LED Street Lights have a zinc coat plated steel body, mono/multi crystalline silicon 130W/175W 17.4V solar panel and LED lamp house.

Our Solar LED Street Lights are small in size and light weight which assists in lower wind resistance and are suitable for most existing or light weight street poles in existence in most capital cities.

Solar LED street lights have high **2000/lumin/28.8lux** luminance efficiency, no pollution and run at a low temperature. This ensures a long life street light which maintains a consistent colour throughout its operational life.
