PRODUCT SPECIFICATION SHEET (AX-PRFF2)

RGB LED FLOOD LIGHT

Product Key Features

- Input Voltage: AC 100V~240V 50/60Hz
- Lamp-house: LED 48 x 1W
- LED Colour: RGB
- Beam Angle: 130° x 60°
- Protection Grade: IP65
- Projection Distance: 15~20m
- Material: Die-casting Aluminium
- Humidity: 10-90%
- Operating Temperature: -20°C ~ 40°C
- Colour Temperature: 2700K/5000K/8000K

Controlling System

- Autocontrol mode: Change all connected lights synchronously
- DMX control mode: International standard DMX512 signal control
- DMX address: Digital tube key-press set up

Overview

Axent's range of LED flood lights utilise high power LED's to illuminate large areas such as highways, roads, bridges, tunnels, indoor & outdoor sporting arenas and billboards.

These flood light illuminants are composed from three colours of LED (RGB/YWB) by using a programmable DMX controller. Our flood lights utilise a digital tube address with fixed program and auto-inline function to ensure light is projected over an entire source being a highway, road, sporting arena, billboard etc.
