PRODUCT SPECIFICATION SHEET (AX-302366)

SERVICE STATION, REMOTE CONTROL

Product Key Features

- Hand-held device
- Update Axent pylon signs + price indicator segments
- Real-time wireless communication
- Base station required to communicate to pylons

Product Ships with our Standard 12 Month Warranty

Overview

The Axent Remote Control is a hand-held device which can be used as an alternative communication device to update the sign. The remote control works by communicating to the base station which in turn sends an update to the sign.

It performs the same tasks and communicates to the base station and in turn the pylon in real-time via radio or GSM/GPRS.
