- Mechanical strength and durability
- Optional solar panel
- Complies with Australian Road Standards
- Relay switching control for stand alone units
- Microprocessor control
- Web based software (optional)

Overview

Axent's School Zone Signs have been successfully used throughout Victoria, Queensland, the Northern Territory, Tasmania and most recently New South Wales for a number of years, and provide decreased accident rates during school peak periods when school children are most vulnerable.

Our School Zone Signs use pure white LED's combined with red LED's ideal for varying speed zones in any road environment.
