PRODUCT SPECIFICATION SHEET (AX-LEDTBT10)

T10 LED TUBE LIGHT

Product Key Features

- Longer life than fluorescent tube: min 4 years
- 70%~80% energy-saving over fluorescent tubes
- Solid state, high shock/vibration resistant
- Work with ballast or without ballast
- No RF interference
- No flickering
- Instant soft-start
- Minimum maintenance costs
- Produce little heat
- No mercury and other hazardous materials, fully RoHS-compliant
- Continuous operation for white leds (10 years for other colors)
- Rated to operate from -40°F to 122°F [-40°C to 50°C], perfect for environments with extreme climates

Overview

Axent's range of LED tube lighting has been developed to replace conventional fluorescent light tubes commonly seen in homes and offices today.

These LED tubes have a long lifetime of 50,000+ hours (7+ years) and save 70~80% more energy than fluorescent tubes.

Our LED Tube Lights produce little heat, do not flicker and have no RF interference which were common problems with conventional tubes.

Axent tubes are a direct replacement for conventional fluorescent tubes and have a minimum maintenance costs.
