Product Ships with our Standard 12 Month Warranty

GPRS

SMS

Overview

Axent has recently released their new trailer mounted variable message signs. In situations where permanently mounted VMS are not practical, Axent offers a range of solar powered stand-alone trailer mounted VMS that will meet your needs.

These VMS signs use high efficient LED full matrix displays and are powered by three 125 watt solar panels. Messages can be scheduled to display at any time using various fonts and sizes. The trailer mounted VMS signs are made to use many different communication technologies including GPRS, SMS and Bluetooth.

The trailer contains a hydraulic hoist with lockable tow bar and wheels. For guaranteed operation the trailer contains three by 12V batteries with charger. Each unit ships with many optional extras including radar with fully integrated speed limit triggered messages. The trailers can be designed with corporate colors, powder coating and galvanized trailers.

**** VMS Trailer ships with easy to follow user's manual with screen shots.**
